

## Aerial Work Platform

Aerial Work Platforms - There are lots of accessories meant for lift trucks which could be utilized to help expand the functionality of your lift truck and allow you to pick up items, handle materials with less effort or to finish clean-up jobs.

A lot of the accessories are particularly designed in order to fit on the forks themselves. Fork extensions for instance, are used when you need more fork length, which increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Triangular or rounded accessories are another variety utilized whenever moving rolled material in order to ensure it does not roll off of the traditional flat blades.

Examples of lifting accessories include pivoting and telescoping crane or boom attachments. They could come in a number of various kinds and are normally meant for transferring metal bars, lumber, poles and other kinds of bulky things. Other accessories like other styles of hooks and hook plates are existing in order to pick up objects with a chain or sling. Slab lifters and magnetic filters are other objects which could be used together with hook accessories. Slab lifters are specialized accessories that are intended for lifting different materials that are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which connect to your forklift to be able to make transferring rolls of carpet a lot easier. The attachment hooks onto the forklift's forks and has a pole that goes through the middle of the carpet roll.

There are many different kinds of forklift attachments that could be designed for facility maintenance like for example snow blades. These blades connect to front end loaders and can transfer materials such as soil, snow and dirt. Other popular cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers consist of a broom that the lift truck blades hook onto for sweeping large spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in areas where there is lots of metal debris like on shop floors for example. Sweepers have widths as much as 60 inches and this surface area makes clean up quick and simple.

A material spreader is another forklift attachment which is often utilized at facilities. These spreaders are helpful for a variety of applications like spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting attachment which many companies make use of day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models presented that are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location utilizing the forklift. Larger platform units have extra space for workers to carry tools and other necessary items intended for the task. Often work platforms are made of poly material or steel.
