Capacities of these various truck designs vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing lift truck company in the North American marketplace, due to their stability in retaining a high degree of consumer service excellence and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. forklift division based in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original domestic lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national machinery expansion project. Initial product sales of this industrial equipment focused on large business communities, the armed services and on state-run companies. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Daewoo started the first domestic forklift business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological advancements combined with sales success placed them in a situation of significant growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the very competitive North American materials handling industry. This joint-venture proved highly profitable for Daewoo and their forklift product sales expanded greatly. In 1984, the company completed development of a new facility to help in producing high end value-added goods for export. In 1993, the company had a international sales system and started exporting designs they had developed through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international marketplaces.
