

## JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country journey in their RV. Freshly retired, after spending several years working with his brother to manufacture their crane company into an market leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

During their journey, John reacquainted himself with former business connections along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite marketplace for a product that could quickly and safely elevate individuals in the air to accomplish maintenance and other building functions.

After returning from their trip, John set up a business with two of his friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty personnel, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into current models.

JLG forklifts have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into many markets worldwide and develops new products to make certain consumers are capable of being more effective and perform in the workplace within a safer atmosphere.
